

Electronic health records: a new tool to combat chronic kidney disease?

Navaneethan SD, Jolly SE, Sharp J, et al. (2013)

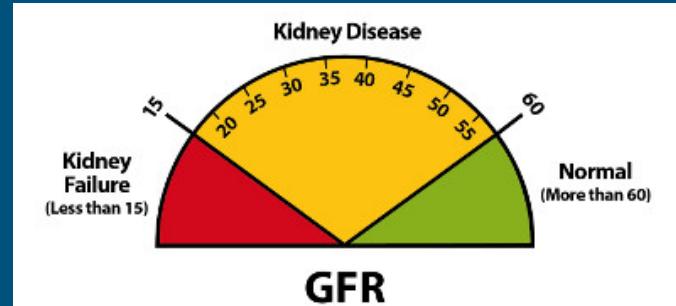

Andreas Sakapetis

Intro

- C.K.D facts
- E.H.R timeline
- What is E.H.R
- Why E.H.R?
- Management of C.K.D
- CCHS
- Development of C.K.D registry
- MyChart
- Limitations
- Questions

Chronic kidney disease (C.K.D) facts:

- ❖ A gradual loss of kidney function over time.
- ❖ 5 stages of kidney damage
 - ❖ Stage 1 (eGFR greater than 90)
 - ❖ Stage 2 (eGFR between 60 and 89)
 - ❖ Stage 3 (eGFR between 30 and 59)
 - ❖ Stage 4 (eGFR between 15 and 30)
 - ❖ Stage 5 (eGFR less than 15)
- ❖ 5–10 million people die annually from kidney disease.
- ❖ Medicare spends over 33 Bn \$ annually for care to C.K.D patients.

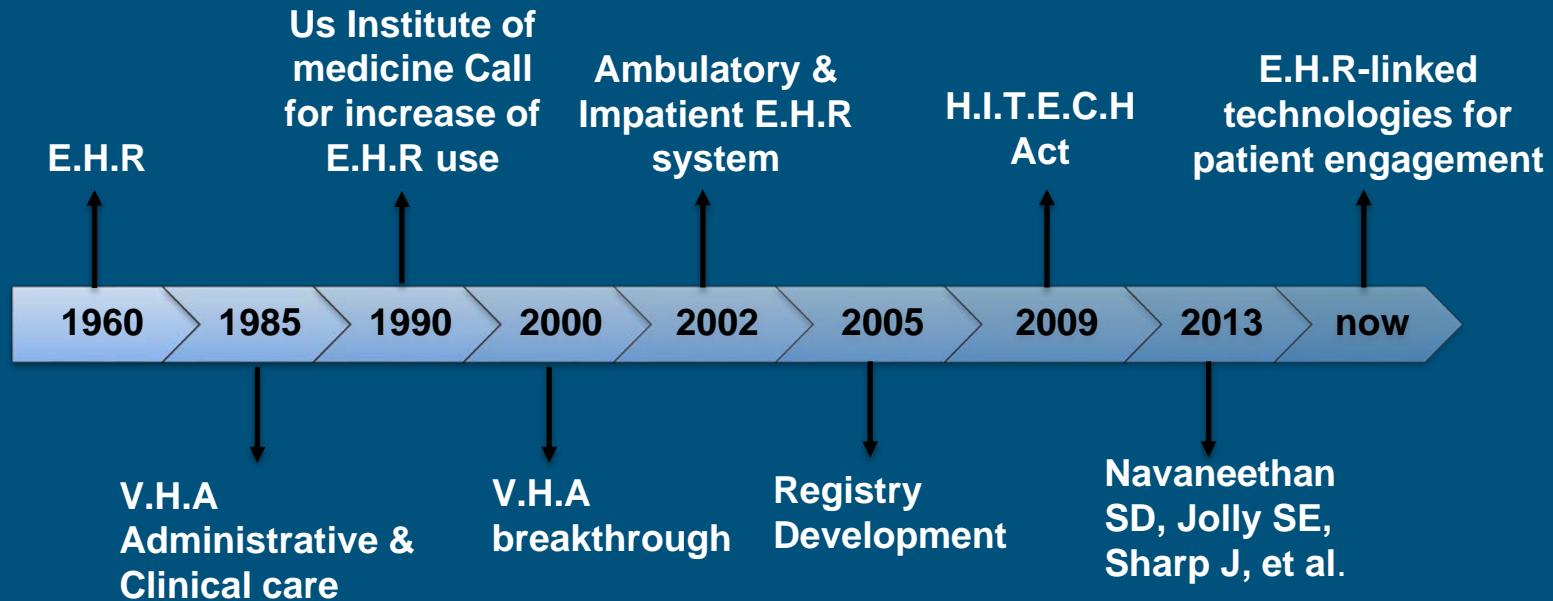

Estimated glomerular filtration rate(EGFR)

- Your doctor can calculate it from the results of your blood creatinine test, your age, body size and gender

- Your eGFR is a number based on your blood test for creatinine, a waste product in your blood. It tells how well your kidneys are working.

$$GFR = \frac{\text{Urine Concentration} \times \text{Urine Flow}}{\text{Plasma Concentration}}$$

Electronic Health Records

Why E.H.R ?

- ❖ Allowed for improved aggregation of patient data.
- ❖ Reporting of data.
- ❖ Long Term data (age, gender, ethnicity).
- ❖ Laboratory results.
- ❖ Standardized data
 - ❖ Medications.
 - ❖ Diagnoses.
- ❖ Enhanced surveillance & monitoring.
- ❖ Decreased medical errors.
- ❖ Increased adherence in guideline-based care.
- ❖ Data superior to claims and administration data.
- ❖ Improvement in diabetes quality of care.
- ❖ Facilitated interventions on smoking cessation.
- ❖ E.H.Rs systems for large-scale, high-throughput genetic research

Management of C.K.D

Problems

- Late referral to nephrologists!
- Automated estimated glomerular filtration rate (eGFR) is not patient-centered!
- C.KD management requires coordination care!

Solutions

- √ Automated clinical alerts using E.H.Rs.
- √ Clinical Decision Support System in E.H.Rs to improve C.K.D care.
- √ Referral System using E.H.Rs
 - Improved AVF placement

Cleveland Clinic health system (CCHS)

- CCHS is comprised of the Cleveland Clinic main hospital and its 15 community-based health centers, along with 8 community hospitals.
- Serve estimated population 1.5 million people with 75% of patients coming from the 7 counties

Development of E.H.R based C.K.D registry (1)

Intent:

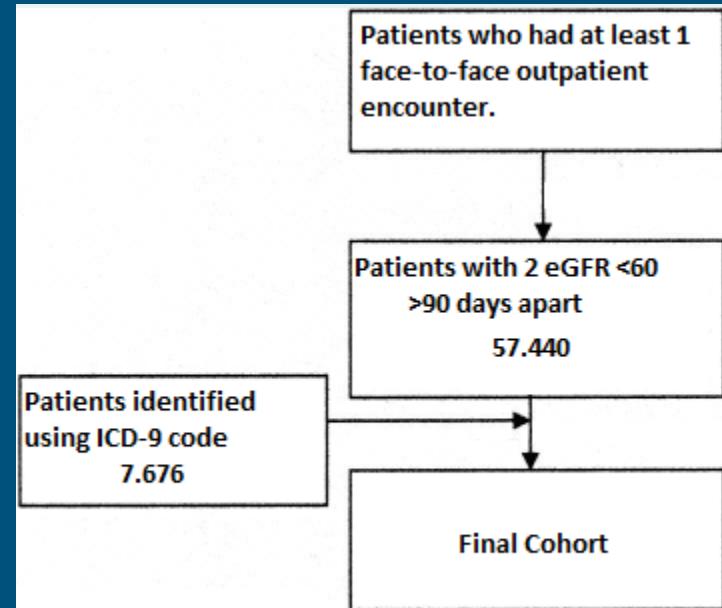

- ❖ Identify novel methods to develop programs that improve C.K.D patient care.
- ❖ E.H.R based registry to support clinical research.

Registry contains data from:

- ❖ Cleveland Clinic Health System E.H.R
- ❖ United States Renal Data System
- ❖ Social Security Death Index

Selection of C.K.D Patients ?

Total Patients: 65.116

Development of E.H.R based C.K.D registry (2)

Contribution

- ❖ Reliability for outcomes research.
- ❖ Identified patients with proteinuria.
- ❖ Identified patients with albuminuria assessments.
- ❖ Identify patients with progressed E.S.R.D
- ❖ Aggregation of patient data for quality improvement.
- ❖ Creation of P.H.R (MyChart)
- ❖ Identifying participants for other clinical trials.
- ❖ Useful for health services research.

Potential

- ❖ C.K.D care might improve with E.H.R based programs.
- ❖ Examine cost incurred for management aspects of C.K.D
- ❖ Development of C.K.D patient navigator program
- ❖ Allows of research at individual patient level, health system and population levels.

MyChart options:

- Activate P.H.R account.
- Access, manage, share health information with health care providers.
- Navigate around the secure web-based application.
- Review and schedule appointments.
- Request prescription renewals.
- View health summaries.
- Access a current list of medications.
- Review test results.
- Patients also receive automated important health reminders.

The Health Summary provides you with personal health information from your electronic health record and is made available to you at the discretion of your physician(s). If your health summary does not contain health information that you expected to see, or if you feel any of your information is inaccurate, please ask your physician to update your health summary during your next office visit.

Limitations

- Human and Capital Resources inequalities among health care settings in adopting the E.H.Rs.
- Privacy rules for protecting personal health information.
- Data relating to death and dialysis might not be readily available.
- Usefulness of the P.H.R relies on the level of engagement of patients with their health.

Your Opinion

- What do you think could be done to improve engagement of patients with their health and so their use of the PHR ?

- Can E.H.Rs fully function with current privacy rules?
